

### **GPS World**

[www.gpsworld.com](http://www.gpsworld.com)

GPS World is an international, business-to-business monthly journal that features news and applications of the global positioning system (GPS), the developing Galileo system, Glonass, and related technologies. GPS World provides news reporting and analysis of business and technology developments, marketing trends, and policy issues affecting the GPS community. Its articles are targeted to design engineers, systems integrators, original equipment manufacturers, and those experienced in high-precision GPS applications. The site features current and past issues, descriptions of new products and services, and connections to other GPS-related Web sites.

### **ISO**

[www.iso.org](http://www.iso.org)

The International Organization for Standardization (ISO) is a worldwide federation of national standards bodies from more than 140 countries, one from each country. The ISO promotes the development of standardization and related activities in the world with a view to facilitating the international exchange of goods and services, and develops cooperation in the spheres of intellectual, scientific, technological and economic activity. It is the source of ISO 9000 and more than 13,700 international standards.

### **Defense Modeling and Simulation Office**

[www.dmsomil/public](http://www.dmsomil/public)

The Defense Modeling and Simulation Office (DMSO) is the catalyst organization for Department of Defense (DoD) modeling and simulation and ensures that modeling and simulation technology development is consistent with other related initiatives. The DMSO encourages cooperation, synergism, and cost-effectiveness among the modeling and simulation activities of the DoD components. The DMSO supports the warfighter by leading a defense-wide team in fostering the interoperability, reuse, and affordability of modeling and simulation and the responsive application of these tools to provide revolutionary warfighting capabilities and improve aspects of DoD operations.

### **autoid.org**

[www.autoid.org](http://www.autoid.org)

The goal of autoid.org is to keep end users, organizations, and companies in the automatic identification and data collection industry up to date with essential standards activities and technical information that can effect business decisions. The site features new documents and news sections with information from and links to the American National Standards Institute, ISO, International Electrotechnical Commission, International Committee for Information Technology Standards, industry links, presentations, standards, and more.
